

17 GALLON LOW-PROFILE OIL DRAIN W/FOOT PUMP ACCESSORY

This low-profile oil drain is designed for use with heavy-duty trucks, buses, RV's and other low-profile heavy-duty equipment. It is ideal for use with oil and engine coolants. This high-impact polyethylene tank is strong and durable as well as dent resistant and lightweight for easy handling.

The new Foot Pump is ideal for transferring used oil and other nonflammable fluids in the shop from the low-profile drains into a waste oil containment system. The pump will siphon fluids from a variety of drain styles and capacities.

Features include:

- 17-gallon capacity
- 7-3/4" ground clearance
- High-impact roto-molded polyethylene construction
- Reinforced ribbing providing added support
- Four-caster design providing superior stability and mobility
- Long reach T-handle making drain easy to position under the vehicle
- T-handle folds for compact storage
- Expanded metal shield reducing splash
- Recessed drain valve providing optimal protection
- NEW - Evacuation Foot Pump Accessory to transfer used oil and nonflammable fluids

Evacuation Foot Pump Accessory Features include:

- 6' suction hose 1" in diameter
- 8' discharge hose with J-Hook
- Approximately 8 strokes per gallon
- Ideal for use with JDI-17PLP
- Constructed of durable polypropylene
